

10A4BV

Switch/Combiner, 4 Port DC 4 GHz, TTL

Need an integrated switch with combiner to do modulated signal testing on your new radios/amplifiers? REC's new 10A4BV combines and then switches two RF ports with over 120 dB isolation and can handle up to 2W CW on each port.

PRODUCT FEATURES

- Integrated switch and combiner
- 120 dB isolation
- TTL controlled

BENEFITS

- Saves space and reduces cost
- Suitable for test & measurement applications
- Saves on power

SPECIFICATIONS

Frequency	380 MHz – 3850 MHz
Isolation; input to output	120 dB
Units EMI	70 dB @ 1"
Input Power Max	32 dBm
Damage Level	>34 dBm
Insertion Loss	<2.5 dB
Control	3.3V TTL
Bias	3.3V @ .6 mA
Size	4.00" x 4.00" x 1.13"
