13.0 – 18.5 GHz Drop-In Isolator, Ku-Band, 2L9BBL

For use in Satcom and VSAT applications, Renaissance has designed this Ku-Band isolator. For the 13.0 – 18.5 GHz frequency range, high temperature stability provides assurance of performance levels under extreme conditions.

Features and Benefits
- Ideal for up-converters
- Temperature stability assures performance under extreme environmental conditions
- Wide frequency range

Specifications
- Frequency: 13.0 – 18.5 GHz
- Insertion loss: 1.0 dB
- Isolation: 14 dB
- VSWR: 1.50 : 1
- Termination: 5 W
- Temperature: -54°C to 90°C
- Storage Temperature: -55°C to 125°C
- Size: .500 x .250 x .150
