

Online Sales Facility

Online sales option for stock products has been introduced on the Renaissance Electronics website ([see here](#)). Payment can be made by credit card or through Paypal. This speeds up the ordering and payment process and makes it available at all times of the day and on all days. Telephone and e-mail sales options are still available as before.

For more information on how HXI and Renaissance Electronics Corporation can give smart solutions to your challenging applications contact us at 978-772-7774 or www.rec-usa.com / www.hxi.com.

30 GHz Drop-In Isolator

Renaissance Electronics has designed a new drop-in isolator for Satcom applications covering the 30-33 GHz frequency range (Model No. 2L9NEU-RoHS). The unit has less than 1 dB Insertion Loss and more than 16 dB Isolation and Return Loss over the temperature range -20 to +60°C. It is capable of handling 40 watts of forward and 10 watts of reflected power.

Comprehensive information about various Renaissance/HXI products is available at our websites www.rec-usa.com / www.hxi.com.

Super Low Latency Millimeter Wave Transport

Renaissance/HXI LightSpeed series high capacity Millimeter Wave Radios dominate the industry with super low latency for time critical applications like VOIP and financial transaction commands. The LightSpeed radio link is ideal for financial transactions considering the nanosecond time scales involved. Latencies of less than 40 nanoseconds, combined with full Gigabit Ethernet rates of 1.25 Gbps full duplex, offer a "fast as light" solution with fiber capacities.

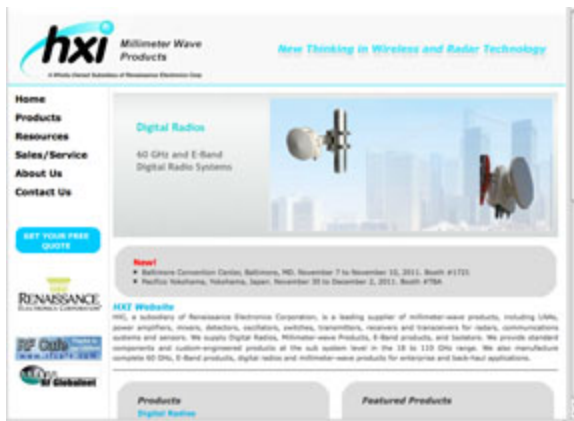

Available in multiple configurations in either the unlicensed 60 GHz band or the light licensed 70/80 GHz band, with antenna configurations offering ranges of over 5 km, these radios have convincingly demonstrated their reliability in many demanding deployments worldwide.

Approved by the FCC in the US, Industry Canada and ETSI in the European Union, Renaissance/HXI LightSpeed links can be custom configured for the most demanding commercial and military applications. LightSpeed series 6451/6651 and 7451/7651 radio links are just some of the numerous communication solutions from Renaissance/HXI, a time tested supplier of Millimeter Wave Radios.

For more information about these radios and other Renaissance/HXI products contact us at 978-772-7774 or visit www.rec-usa.com / www.hxi.com.

New Website for HXI Product Line

Renaissance Electronics and HXI are happy to unveil the new revamped website for HXI products (www.hxi.com) which offers, among other things, a comprehensive catalog of products. It also offers options to search data sheets by keywords, send enquiries online and sign up for the newsletter that provides regular product updates.

To speak to us about any of your requirements call us at 978-772-7774.

Company Profile Updated

The Renaissance Electronics/HXI company profile has been updated with a more complete listing of product categories. It can be viewed [here](#).

For more information on any of our products contact us at 978-772-7774 or www.rec-usa.com / www.hxi.com.
