

## **758 – 803 MHz Compact Surface Mount Isolator, 2SLE2NCT**

For compact 800 MHz transceiver applications, REC has designed a surface mount isolator operating between 758 – 803 MHz with a footprint of 0.394 square inch. The isolator can handle up to 5W forward and 0.25W reverse over -10 to 80°C temperature range.
