

## 20th Anniversary Celebration

**September, 2010 (Harvard, MA)** – Renaissance Electronics Corporation celebrated its 20th year in business at Devens Common Center in Devens, Mass., on Friday, August 26. Among the many in attendance were employees and their families, consultants, business associates, and a key customer. Since its start in 1991, Renaissance has grown into a major player in the RF, Microwave, and Millimeter Wave fields; provided employment to many people, educational scholarships to students, and other community services; acquired a subsidiary, HXI, and supported and worked with two sister companies in India.

As part of this anniversary celebration, the Kurian Family Foundation has decided to offer an educational scholarship of up to \$20,000 a year to eligible children of our employees.

The 20th anniversary celebration - which featured Hindustani classical music performed by the Raganjali School of Music, employee service awards, speeches, a new promotional video, an all-American buffet, and a slide show of pictures from over the years - was enjoyed by all.

We are very grateful to our loyal customers for helping us to reach this 20-year milestone. We are also thankful to our suppliers, sales representatives, consultants, and most of all our employees, who have contributed immensely to our continued success. Our vision to be the preferred supplier of all frequency products is becoming a reality and we look forward to many more years as the industry leader, developing and manufacturing RF, Microwave and Millimeter Wave solutions for our customers
