

10.0 – 13.0 GHz Coaxial Isolator, Broadband, 2A8BAU

For use in radar applications, including police, military land, airborne and naval radars, Renaissance offers this 10 - 13 GHz broadband coaxial isolator. It provides solid system fidelity through low insertion loss, and easy installation with its compact size.

Features and Benefits

- High power (400 W Peak)
- High isolation and low insertion loss for solid system fidelity
- Compact size
- Industrial temperature range
- Ideal for various types of radar applications

Specifications

Frequency	10.0 – 13.0 GHz
Insertion loss	0.4 dB Typ
Isolation	20 dB Typ
VSWR	1.25 : 1 Max
Power	60 W CW 400 W Peak
Temperature	-40°C to 80°C
Size	0.75" x 0.75" x 0.50
